

# Status of HRD and Future Goals

By  
Phonpasit Phissamay

# HRD Program

- Create the Institutional capacity of Natural Language Processing Group
- Integrated the research papers and research output into the education curriculum at National university and other technical school
- Share the experience with the developer both company and programmer
- Conduct the training for target group
- Organize seminar for the public distribution

# Capacity building for NLP

- Attend and/or organize the National and Regional training under scope of the PAN Localization project and other funding support.
- Send the technical engineer to conduct the research at the actual laboratory in oversea (Pakistan, Thailand) funded by the Project
- Invited the foreigner expert to assist the Local team to conduct the research work (Nadir, Dullip, Artiz)
- Send the technical staffs for the continue study at Master degree in oversea (Thailand, Australia, India)

# Enhance the education program

- Allowed the students from various universities and institutes to do the assignment and development with the supervision of our engineer and also in our Lab
- Provide the research papers to university, which the teacher can including in their teaching material. Now we are also assist the National university to have the curriculum.

# Working with the other developer

- Enhance the existing application by the other developers.  
(Lexical, Dictionary, Fonts, Open Office localization)
- Helping other developer to integrate our research application into their application program, Exp
  - Syllabification utility and the convertor are widely used in the press sectors.
  - Sorting utility is used with the database application

# Public awareness and training

- Conduct the technical training for the target group
- Organize the end user training not only in Vientiane, but also in the province
- Organized the National workshop, when the new application have to release.

# Future Goals

- Maintaining and strengthening the National Institute to be the Center of Excellence for the Localization research and development
- Support the sustainable development
