

Vision beyond 2010

By
Phonpasit Phissamay

What we get from PAN Localization

- *We have NLP*
- *We have Center of excellent for localization R&D*
- *Good collaboration among stakeholders*
- *Strong influent on National ICT policy and standard*
- *Research products are very well accepted*
- *The project staffs have gradually improved their technical skills*

Vision beyond 2010

- Look for the implementation of PAN Localization phase III
 - Research on Technology:
 - Search Engine, Webpage translation, Mobile localization
 - Development of specific application for rural people. Application for farmer, for rural communities
 - Deployment of the phase I and phase II products
 - Integrated the research output into the major software and hardware
 - Integrated the localization functions into the e-government application.
 - More on Training
 - More on Content

Sustainability

- Need the government subsidize
- Generate income:
 - Do the service for the government
 - Make the product for selling in the local market
 - Licensing for commercial use.
 - Integrate with other commercial software and share profit
- Collaboration with academy institute and private sector on win-win policy on localization of any future software
- Maintain and strengthening the PAN Localization Network and Spirit
 - www.panl10n.net Generate revenue
 - PAN Localization Forum in every year.
